

This year we have given you suggestions about helping your community and the people around you. Now it is time to turn your ideas into actions!

You have the power to start a community project and March is the perfect month.

The snow is melting, the sun is out, and there is plenty of green grass that may need some help after a long winter.

The Starting Five are back to let you know about Earth-friendly projects that they are involved in.....

The Pacers and Fever staff will be working with young people in our community on several Earth Day projects in April.

YOU CAN GET YOUR CLASS OR SCHOOL INVOLVED IN EARTH DAY PROJECTS TOO! HAVE YOU THOUGHT ABOUT.....

"Working with your class to clean up a local park?"

"Cleaning up graffiti by painting murals on the sides of buildings in your community?"

"Starting a recycling drive in your school?"

"Asking your school if you're using energy-efficient light bulbs or other energy saving products?"

"Planting trees or flowers on school grounds?"

YOUR GOAL:

Get a project started in your school so it can be completed by April 22nd, which is Earth Day!

You never know, your school may be recognized for your outstanding environmental efforts.

The LEAGUE and the Pacers Foundation will be awarding an Indiana State Trophy for the school who has the biggest impact during the month of April.

GET STARTED!

Grab your teacher and go to www.theleague.org to find out more.
